Forecast for Friday 25 Nov 2022

Weather: Showery rain overnight but a few clearer spells too and showers tending to ease around dawn. Some early morning mist is possible in places. A few showers lingering in the morning period but these gradually fizzling out and long bright or sunny spells developing. Mainly dry in the afternoon but feeling cool in the blustery winds. Increasing cloud spilling in from the west later on Friday evening.

Chance of cloud-free hill tops above 600m: 80% associated with morning showers increasing to 95% as showers die out.

Low cloud and visibility: Low cloud associated with the showery rain in the early morning will mean layers of cloud above 500m around showers, the cloud will gradually thin and break with just patches around 600m by mid morning. Visibility will be moderate in early showers or mist but will improve during the day and be very good during the afternoon with good views across the Peak District.

Meteorologist's View

Risk of gale force gusts during the early morning around higher summits like Kinder Scout and feeling very cold in early showers and strong winds.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Thu 24 Nov 2022	9.2mm	18.6mm	34.2mm

Forecast for Saturday 26 Nov 2022

Weather: Cloudy overnight with some mist and fog patches developing around dawn. It will be a bright day with some early sunshine but increasing cloud during the morning with some drizzle possible by late afternoon especially for the north towards Dovestone. Rain and gales spreading east in the evening. Rain is likely to become persistent during the evening, perhaps some breaks further east.

Maximum wind: Southerly 20mph with gusts 30-35mph.

Chance of cloud-free hill tops above 600m: 80% falling to 60% as cloud thickens during the afternoon, especially in the west.

Low cloud and visibility: Patches of low cloud above 500m in the morning with visibility below the cloud turning moderate during the afternoon, cloud will lower and thicken in the afternoon in the west, remaining mainly bright towards Bradfield and Matlock, eastern areas will see more breaks and less cloud in general. By late afternoon broken cloud above 400m is likely around northwestern hills and in the rain visibility is likely to be poor at times during the evening.

Temperature: **Valleys:** Plus 11 Celsius.
At 600m: Plus 6 or 7 Celsius.
Freezing level: Above all summits.
